Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. It isn't clear as what the rotational means for rotating the support member peripherally of the located groove means. The specification recites the phrase "a rotational means for rotating the supporting member peripherally of the located groove". However, the specification doesn't provide a detailed description of how the rotational means is rotates the support member peripherally of the located groove. It isn't clear as to what peripherally of the located groove is being referred to.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-11, it isn't clear as what the rotational means for rotating the support member peripherally of the located groove means. The specification recites the phrase "a rotational means for rotating the supporting member peripherally of the located groove". However, the specification doesn't provide a detailed description of how the rotational means is rotates the support member peripherally of the located groove. It isn't clear as to what peripherally of the located groove is being referred to. In claim 1,

Art Unit: 3764

the last sentence, it isn't clear if the rotational means is the same rotational means recited in claim 1, line 6.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(d) the invention was first patented or caused to be patented, or was the subject of an inventor's certificate, by the applicant or his legal representatives or assigns in a foreign country prior to the date of the application for patent in this country on an application for patent or inventor's certificate filed more than twelve months before the filing of the application in the United States.

Claims 1, 3-4 and 8 as understood are rejected under 35 U.S.C. 102(d) as being clearly anticipated by 'JP (2004-41383 A).

Allowable Subject Matter

Claims 2, 5-7 and 9-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hassler, Leclabart, Morrison, Huang and Ichikawa, each discloses a massaging device.
